

EVER GIVEN's Estimated Time of Berthing (ETB) at Ports of Discharge

16 July 2021

While EVER GIVEN is en route to her destination ports in Europe, the vessel needs to follow the guidance outlined in its seaworthiness certificate to sail at lower speeds and to call only Rotterdam and Felixstowe. The usual Hamburg port call will be dropped because of concerns surrounding navigation safety. To comply with the safety requirement, the cargoes planned to be discharged in Hamburg will be unloaded in Rotterdam and transshipped to the destination port.

Evergreen Line is coordinating with the terminal operators regarding berth arrangements and will maintain close contact with them to ensure the containers can be discharged as soon as possible when the vessel arrives.

The ship's operational schedule is planned as follows:

- 28 July - ETB Rotterdam Delta Terminal to discharge local imports and transshipments via this port
- 02 August - ETB Rotterdam Euromax Terminal to discharge cargoes to/via Hamburg, then transshipped by EVER UTILE 0014-164E
- 03 August - ETB Felixstowe to discharge local imports
- 08 August – EVER UTILE to call Hamburg and discharge local imports and transshipments via this port

We wish to advise the cargo interests who have yet to provide a General Average (GA) security to expedite this process in order to avoid unnecessary delay in cargo release and delivery at the port of discharge. For cargo interests who have any questions in processing the GA requirements, please contact the GA administrating adjusters directly using the following contact details:

● Parties based in Europe / UK:
eg-casualty@rhl-ct.com
(+44 151 433 3320)

● Parties based in all other locations:
Singapore.GA@rhl-ct.com
