

EVERGREEN LINE

# Evergreen Line Reefer Online Service

Evergreen Line presents state-of-the-art reefer containers featuring advanced IoT technology and a user-friendly online interface. Our goal is to elevate visibility and reliability, enabling swift troubleshooting measures to safeguard perishable refrigerated goods and critical shipments. Customers have online access to monitor comprehensive data related to reefer containers transporting perishable and refrigerated goods throughout their entire journey.

## Enhanced Visibility

- 24/7 Enhanced Visibility
- Real-time tracking of reefer container movements
- Continuous monitoring of internal temperature, humidity, O2, and CO2 levels
- Assurance of cargo integrity during transit

## Digital Access

- User-Friendly Digital Access
- Utilize the intuitive online platform: Shipmentlink
- Seamless access to data monitoring and downloading for an enhanced user experience and operational efficiency

## Supply Chain Optimization

- Proactive supply chain optimization
- Access to reliable online data and optimizing reefer supply chain management
- Ensuring timely and secure delivery of goods
